PROFILE SUMMARY

Passionate B.E. Electronics and Communication Engineering student at R.M.K. College of Engineering and Technology with a strong interest in embedded systems, IoT, artificial intelligence, and full-stack development. Experienced in designing innovative hardware and software solutions through academic projects, hackathons, and product development internships. Skilled in Arduino, ESP32, Android development, React, and modern web technologies, with a keen ability to solve real-world problems using technology. A quick learner who enjoys exploring emerging technologies, collaborating with teams, and continuously enhancing technical and problem-solving skills to create impactful solutions.

EDUCATION

BACHELOR OF ENGINEERING ***(2024-2028)***
R.M.K College of Engineering and Technology
Electronics And Communication - 7.6 (Till Date)

HIGHER SECONDARY ***(2023-2024)***
DAV Matriculation Higher Secondary School
Secured - 84.5%

SECONDARY SCHOOL ***(2021-2022)***
Jaigopal Garodia Mat Higher Secondary School
Secured - 94.4%

PROJECTS

Multilingual Voice-Controlled Smart Wheelchair:
Designed and developed an IoT-enabled smart wheelchair controlled through multilingual voice commands using an Android application. Integrated Arduino, Bluetooth communication, ultrasonic obstacle detection, and motor control to provide safe, hands-free mobility with real-time obstacle avoidance.

Quip – AI Business Assistant:
Developed an AI-powered business assistant that enables users to interact through natural language for business-related queries and task assistance. Integrated AI to deliver intelligent, context-aware responses through a user-friendly conversational interface, improving productivity and user engagement.

Smart Sentinel Robot:
Designed and developed an autonomous security robot capable of obstacle detection, human presence monitoring, voice interaction, and environmental sensing. Integrated Arduino, ultrasonic, PIR, gas, and temperature sensors with motor control to enable intelligent navigation and real-time safety monitoring.

CERTIFICATIONS

- Successfully completed NPTEL Certification (Elite) in Internet of Things.
- Completed Google Flutter App Development training at FITA Academy (2-month program, Sep 2024).
- Completed an Internship in Embedded Systems at DLK Software Solutions, GlobeSci Technology
- Successfully completed NPTEL Certification (Elite) in Sensors And Actuators.
- Intern at Webnique Digital Solutions,Banglore

SKILLS

Programming Languages: Java, Python, C, JavaScript
Web Development: HTML, CSS, React.js, Node.js, Express.js
Mobile Development: Kotlin (Android Studio)
Embedded Systems & IoT: Arduino, ESP32, Embedded Systems, IoT, Sensor Integration
Artificial Intelligence: AI Chatbots, Prompt Engineering
Database Management: MySQL, Firebase
Tools & Platforms: Git, GitHub, VS Code, Arduino IDE, Android Studio, Vercel

ACHIEVEMENTS AND PATENTS

- Patent Filed for "Multilingual Voice-Controlled Smart Wheelchair with Obstacle Detection and Mobile Application Integration" and "Smart Sentinel Robot
- Secured First Prize for the project "Smart Obstacle Detection & Alert System for Visually Impaired" at RMK College of Engineering and Technology Project Exhibition.
- Awarded First Prize in Garage Innovators at the National Level Technical Symposium TWYSTRA'26, RMKCET.
- Won Second Prize in the Mini Project Contest organized by the Department of Electronics and Communication Engineering, RMKCET.
- Secured Second Prize in ElectraXpo (Project Expo) at ELECTROWIZ'26, Velammal Engineering College.
- Presented "Smart Sentinels" and "TechMobility Innovators" Projects at TECHNOVATION, Kurukshetra'26, College of Engineering Guindy, Anna University, Chennai.
- Secured Third Prize in Innolab at FAISCA 2K25-2.0, New Prince Shri Bhavani College of Engineering and Technology.
- Secured Third Prize in Science and Innnovation at RMK College of Engineering and Technology
